

Snopero: Next-Gen AI Fire Safety Management

Centralizes fire safety compliance, asset tracking, and AI-driven risk analysis for service providers and facility owners.

INTELLIGENT COMPLIANCE & AI RISK ANALYSIS

BYKHY,
ISO
11602-2,
EN 671-3

Regulation-Ready Tracking

Manages periodic inspection and reporting for BYKHY, ISO 11602-2, and EN 671-3 standards.

BUSINESS GROWTH & OPERATIONAL CONTROL

Automated Sales Opportunities

Identifies renewal needs automatically based on equipment lifespan and warranty expiration dates.

Tiered Dealer Management

Allows Super Admins to oversee all accounts while dealers manage only their specific customers.

QR-Based Asset Tracking

Enables instant equipment identification and status updates through integrated QR code scanning.

87% Predictive Risk Detection

AI analyzes sensor health to predict failure probabilities and automate preventive maintenance alerts.

Visual Asset Mapping

Provides a building-based map showing the live status of every fire safety device.

PLATFORM SCALABILITY & TIERS

	Basic	Standard	Pro
Asset Limit	300 Assets	1,000 Assets	5,000 Assets
Key Capabilities	Notifications & bulk import/export	Service planning & technician assignment	At risk scores & advanced analytics
